

# A VISIBLE COMMITMENT TO SUSTAINABILITY

What was once considered waste can now remain a beautiful part of our lives

# THE GOOD PLASTIC COMPANY IS A EUROPEAN-BASED MANUFACTURER OF RECYCLED PLASTIC PANELS

The company was founded in 2018 with a mission that is determined as contribution to solving the problem of the 400 million tonnes of plastic waste that are generated annually. Now The Good Plastic Company is an international manufacturer of recycled plastic panels that helps brands to make a visible commitment to sustainability.

The Good Plastic Company is focused on the large-scale environmental impact by filling the gap between recycling and business.

Recycling centres worldwide process thousands of tonnes of plastic each per month. However, uses for this recycled material remain limited. The Good Plastic Company's recycled plastic panels enable new applications for this valuable resource.

On the other side, businesses all around the world are implementing circular economy business models, driven by regulation and market demand. This sustainability transformation is a substantial challenge but also represents an opportunity for all companies in the value chain. Businesses need a tangible way to demonstrate shared values to their customers and enhance brand affinity. Incorporating recycled materials into retail and commercial interior implementations is a highly effective method for brands to make a powerful impression.

# POLYGOOD IS A SURFACE MATERIAL MADE FROM **100% RECYCLED** AND **100% RECYCLABLE** PLASTIC

The sustainable advantages of this material are equalled by its aesthetics. Each pattern has its own unique back-story. Polygood panels are produced from a wide range of post-consumer and post-industrial plastic waste sources, from refrigerators to single-use cutlery, electronics and industrial consumables.

We believe that by generating demand for products made from recycled plastic we can keep this valuable material from ending up in landfill, the oceans, or incinerators.

We demonstrate to companies that they can make beautiful and functional new goods from locally produced waste and make a visible commitment to the circular economy.

Our aspirational goal is to substitute virgin plastic and other non-sustainable materials everywhere possible, thus making recycled plastic a new norm in design and architecture

# MAIN FACTS ABOUT POLYGOOD

**01.**

## TRULY SUSTAINABLE

100% recycled and 100% recyclable, with a take-back and remanufacturing programme

**02.**

## UPCYCLING APPROACH

Made from a single type of plastic to ensure circularity

**03.**

## LARGEST PANEL SIZE AVAILABLE ON THE MARKET

Our standard panel size is 1400x2800mm

**04.**

## AVAILABLE IN INDUSTRIAL VOLUMES

We can supply projects requiring hundreds of square metres of material

**05.**

## LEAD TIME

Large stock of standard patterns maintained, or made to order in 2-3 weeks

**06.**

## SUPERIOR QUALITY

Made from hard plastics with high stiffness, Polygood panels are durable, waterproof, and hygienic

**07.**

## EASY TO WORK WITH

Can be CNC routed, polished, sanded, thermoformed, drilled, glued etc.

**08.**

## CUTTING SERVICE

Based on your requirements

## OUR MANUFACTURING IS **THE HEART** OF OUR COMPANY

We have developed and are patenting to process recycled plastic from different waste streams and turn it into beautiful surface material. This allows us to collect a wide variety of data parameters during processing, including temperature and melting points, pressure, time, and melt flow index.

Our proprietary technology enables us to make recycled panels of the highest quality, which is supported by laboratory test results and certifications to international standards.

Our two current factories in the Netherlands and Ukraine are able to produce more than 1,000 tonnes of recycled plastic panels per year, meeting industrial-scale demand

## WHERE DO WE **SOURCE** RECYCLED PLASTIC RAW MATERIAL

We partner with large recycling centres all over Europe that collect, sort and recycle plastics in order to ensure a high-quality and reliable supply of material. They work both with post-consumer and post-industrial plastics. We and our suppliers have procedures to ensure that we can guarantee the composition of our products to our clients. Working with large-scale recyclers allows us to keep stock consistency over time and in large volumes.

# ORIGINATING FROM A SINGLE TYPE OF PLASTIC MAKES POLYGOOD 100% RECYCLABLE MATERIAL

Dimensions	1400x2800mm, 1400x1400mm
Thicknesses	12mm and 19mm
Thickness tolerance	±0.5mm
Finish	Semi-matte (other finishes available on request); single-faced

# POLYGOOD STANDARD PATTERN RANGE

The Standard pattern range comprises naturalistic and modern patterns in a range of colour palettes that combine beauty and sustainability. The dominant colours in our range reflect some of current trend colours to ensure that your designs are as stylish as they are modern. Available in quantity for large interior and exterior design projects.

**#PS023: VINTAGE PEARL**  
Origin: refrigerators

Origin: small domestic appliances

**#PS2401 SEA FOAM DARK**  
Origin: spools

**#PS014: DARK KNIGHT**  
Origin: household electronic goods

# BESPOKE PATTERN CREATION

New interior design trends emerge all the time and to keep up with them we let our clients create patterns that meet their needs completely without being limited to our standard range. Once created we make sure to maintain raw material availability to ensure that newly created design concepts will remain implementable consistently into the future, and can be made in large volumes.

Bespoke patterns created over the years have turned into a whole Polygood Bespoke Collection available by demand.

The following bespoke patterns illustrate the results of our R&D and custom work. Many of them were created in collaboration with our customers and partners.

We do not usually maintain stock of bespoke designs, so make sure to consult our sales team about the availability of any patterns here that pique your interest – or challenge us to create something unique for you!

# TRANSLUCENT BESPOKE SELECTION

Are you looking for a sustainable solution for your lighting project? Do you want to cast coloured light to accent your interior design? Try our translucent materials! Mix patterns to create interesting effects or ask us to add specks of opaque material for a floating effect. Translucent patterns are available in limited quantities, so discuss your needs with your account manager before placing an order.

**COLOURFUL

**TRANSLUCENT  
SEA FOAM**

# LIGHT SELECTION

Light-coloured patterns are a great fit for any kind of project. But they can be more adventurous than different shades of white. Colourful accents add a touch of charm to pale backgrounds - and, of course, they are sustainable, being made from recycled appliances and single-use cutlery.

**ORANGE PATCHES**

POLYGOOD PANELS  
REDUCE THE NEED  
FOR VIRGIN  
MATERIALS AND  
CAST BRAND  
IDENTITY IN A  
SUSTAINABLE LIGHT**

Distinctive Polygood panels can be used to create modern-looking environmentally-conscious furniture and interior or exterior design elements.

Wall panels and shelving, counter tops and displays, signage and storage: each corner shop, boutique hotel or modern office can give new life to the 5 to 10 tonnes of plastic waste.

# RETAIL

Polygood eco-conscious materials can be a perfect match for the most stylish brands. Retail display fixtures, e.g. shelves, stands, podiums and racks can be made from Polygood panels and serve as the visual proof of the brand's sustainability commitments in practice.

# RESTAURANTS & CAFES

The introduction of eco-friendly practices in cafés and restaurants has a significant impact on customers' purchasing decisions. Building together with Polygood material, each café and restaurant will be able to create its individual atmosphere and implement the concept of a green restaurant, helping to change the world for the better.

## OFFICES & SPACES

When the Green Office concept becomes more than just another trend, it transforms outdated workspaces into eco-friendly environments benefiting both the employees and the business. Contribute to circular economy by choosing recycled plastic for office interiors. The whole workspace area as well as the dining and bathroom areas can be made from Polygood panels.

# HOSPITALITY

Today, modern hotels are changing the industry with sustainable hospitality practices. Polygood is just the right solution to make the interior innovative, impressing guests with its uniqueness and eco-friendly approach.

## EVENTS & EXHIBITION BOOTHS

More and more events are being held according to sustainability principles and using recycled materials for building exhibition booths or even the whole pavilion is a very significant gesture towards sustainability. Surprise your audience with a booth made from Polygood.

# BECOME PART OF OUR TAKE-BACK AND REMANUFACTURING PROGRAMME

Elements built from Polygood at the end of their life span as well as cut-offs created during the fabrication process shall not end up in landfills, they can be recycled and reused multiple times, that's why we are running the Take-back and Remanufacturing Programme on an ongoing basis.

## **Sustainable assembling and construction of the project.**

On our side, we have already created a material that is 100% recycled and 100% recyclable. Your step is to create a sustainable piece of furniture. Because Polygood is a structural material, you don't need wooden supports or other elements to make it stable. This way, it can be easily disassembled and recycled. Remove the glue and protective film to keep the material clean for recycling.

This close the loop and make your contribution in sustainability feasible.
